FOREWORD

TO: Hospital Administrators,
Medical Staffs, and Nurses

This is the 1965 report of infant and fetal mortality rates of Montana hospitals. The figures in this report were taken from birth and death certificates reported to the State Board of Health, Division of Vital Statistics.

In 1965 there were 13,412 births in Montana by place of occurrence. There were 239 neonatal deaths, with a rate of 17.8 per 1,000 live births. There were 175 stillbirths, with a rate of 13.0 per 1,000 live births. Perinatal deaths numbered 414, with a rate of 30.9 per 1,000 live births.

This report allows hospitals to see where they stand with other Montana hospitals, and it may indicate a need for evaluation of services to insure improvement in the future.
